

Great 👍 You have successfully entered the **AWS Management Console**.

Since you were learning about **Amazon S3**, the next step is to **create your first S3 Bucket**.

Step 1: Open Amazon S3

At the top-left, click the **Search** bar and type:

S3

Then click **S3 / Amazon S3** from the results.

Step 2: Create a Bucket 🪸

Once the S3 page opens:

1. Click **Create bucket**
2. You will see the bucket configuration page.

After you reach the **Create bucket** page, send me a screenshot, and I'll guide you step by step.

===

Yes 👍 **That means your AWS account signup is completed successfully.** You are now back on the **AWS Management Console**.

Your region is currently:

Asia Pacific (Sydney) — **ap-southeast-2**

Next step: Open Amazon S3 🪸

1. Click the **Search** bar at the top.
2. Type **S3**
3. Click **S3** or **Amazon S3**.

Then you should see the **Amazon S3 dashboard**.

After that, click **Create bucket**.

⚠ When you reach the **Create bucket** page, don't create it yet—send me the screenshot. I'll tell you exactly what to select so you avoid unnecessary charges or incorrect settings.

===

Perfect 👍 Your AWS account is active, and you have changed the region to:

Asia Pacific (Mumbai) — ap-south-1 🇮🇳

This is a good choice since you are in India.

Next step: Open Amazon S3 🪣

At the top, click the **Search** box and type:

S3

Then select **Amazon S3** from the results.

After the S3 page opens, click **Create bucket** and send me the next screenshot.

===

Yes, this email explains exactly what is happening. 👍

AWS says:

“I have reopened your account. It can take up to 24 hours for all services to activate.”

So your account **has been successfully reopened** after it was accidentally closed.

What you should do now

- ✅ Your AWS account is reopened.
- ⌚ Wait up to **24 hours from the time AWS reopened it**.
- 📧 Check your email for any further AWS verification requests.
- ❌ Don't create another AWS account.
- ❌ Don't click **Upgrade plan**.
- After activation, log in again and try opening **Amazon S3**.

The email was received at about **1:07 AM**, according to your screenshot, so AWS services may take up to **around 1:07 AM the next day** to fully activate.

Your next step is simply to **wait for the activation to complete.**
